WHAT DOES YOUR BMI MEAN?

Categories:

Normal weight: BMI = 18.5—24.9. Good for you! Try not to gain weight.

Overweight: BMI = 25—29.9. Do not gain any weight, especially if your waist measurement is high. You need to lose weight if you have two or more risk factors for heart disease and are overweight, or have a high waist measurement.

Obese: BMI = 30 or greater. You need to lose weight. Lose weight slowly—about ½ to 2 pounds a week. See your doctor or a nutritionist if you need help.
